Follow us on:

Every day, companies just like yours are faced with tough decisions and seemingly insurmountable challenges. As the Mid-Atlantic region's premier advisor to government contractors, Aronson & Company believes that an innovative cure to any business problem starts with a complete diagnosis. Our unique government contracting "Ecosystem" brings together a diverse group of service offerings that create a total package for business success unparalleled in the industry.

Rather than just address your government sales plan or strategies for minimizing tax liability, Aronson & Company helps you make all of the aspects of your business work together. Our diverse service offerings and large group of accounting and consulting experts create the total solution for government contractors.

ASSURANCE

From the preparation of financial statements, to providing business and financial consulting, we work to perfect the nature of your business. A&C recognizes that assurance services are typically mandated by third-party lenders or creditors, shareholders, bonding companies, or security regulators. We take pride in having perfected a methodology for addressing the requirements of all of these users. We apply our extensive industry knowledge to bring you efficient and effective assurance services, which improve internal accounting controls and reporting systems by offering proactive advice in areas of importance to your company. As the landscape continues to evolve to IFRS, we can help you navigate the inevitable challenges ahead.

TAX

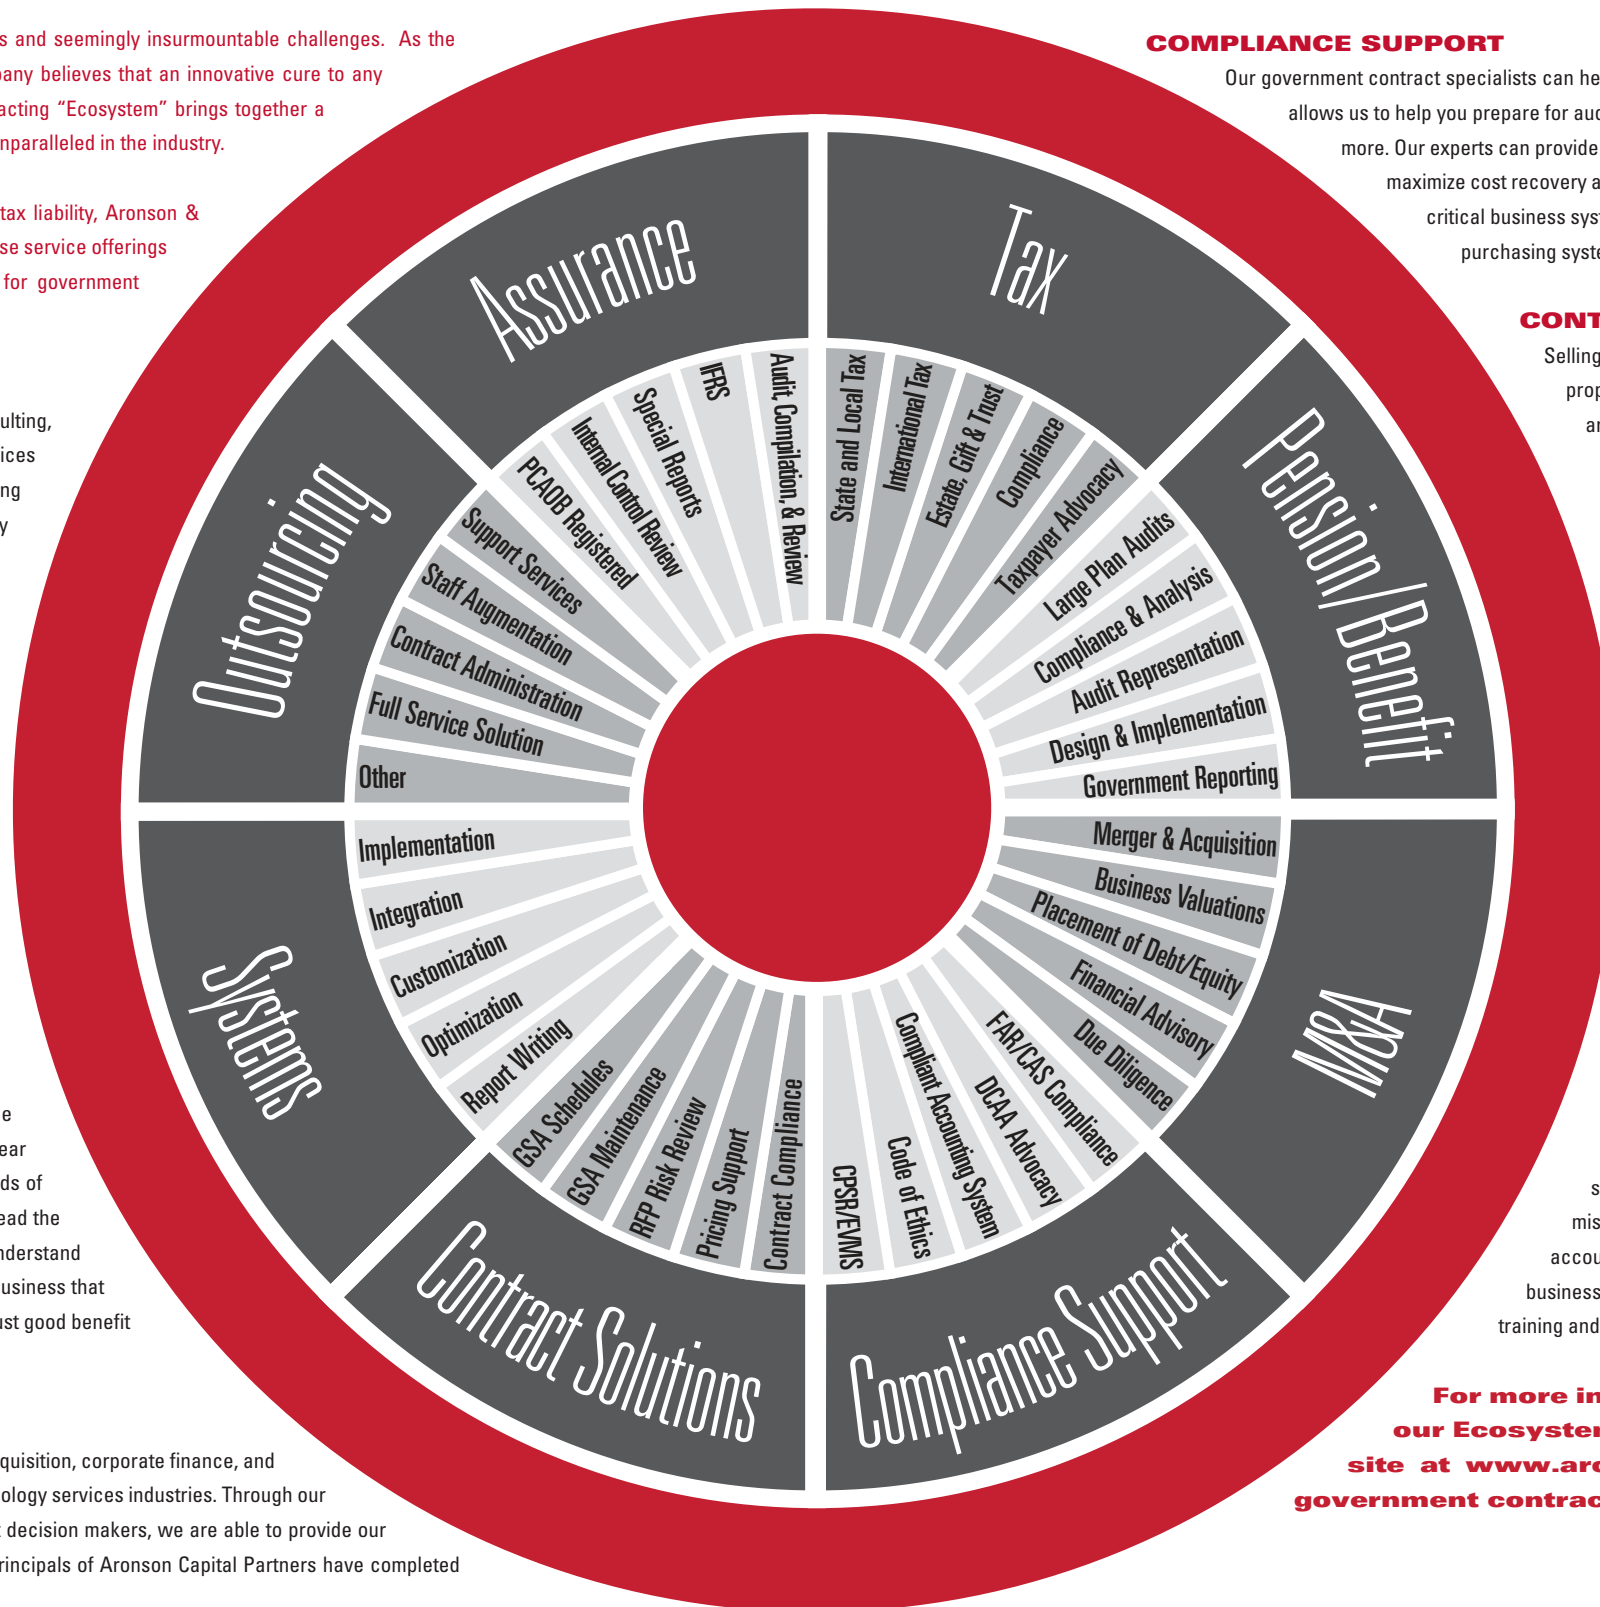

A&C examines your specific tax planning goals and then develops strategies to minimize tax costs to your company while staying in compliance with local, state, and federal regulations. Once we have determined your tax needs, we will perform the functions of completing the necessary federal and state income tax returns. We advocate for your interests on matters relative to all taxing authorities.

PENSION / BENEFIT

A&C understands the complex aspects of benefit plans and applies a well-rounded knowledge of the industry to help you meet and exceed your business goals. The benefits area is dynamic and change is Congressionally-controlled. With a 40-year history of service, A&C anticipates changes and enables clients to meet the demands of aligning their business, employee and regulatory goals. While virtually anyone can read the rules related to benefit plans, very few can provide the perspective necessary to understand how the rules may be applied. It is our commitment to perfecting the nature of your business that drives our professional staff to help you make good business decisions, rather than just good benefit decisions.

MERGERS & ACQUISITIONS

Aronson Capital Partners, LLC is a leading investment bank providing mergers and acquisition, corporate finance, and valuation services to middle-market companies in the defense and government technology services industries. Through our extensive relationships with strategic buyers, private equity groups and government decision makers, we are able to provide our clients with timely strategic advice and access to active market participants. The principals of Aronson Capital Partners have completed over 50 M&A transactions and raised over \$1.0 billion in capital.

COMPLIANCE SUPPORT

Our government contract specialists can help you navigate the complexities of compliance issues. Extensive experience with DCAA allows us to help you prepare for audits, perform accounting system "mock" reviews, prepare incurred cost submissions and more. Our experts can provide direct and indirect cost structure reviews to ensure compliance with cost regulations, to maximize cost recovery and to enhance a company's competitive position. Aronson & Company experts support all critical business systems – from the development of an Earned Value Management System, to preparing your purchasing system for review, to deploying a code of business conduct and ethics.

CONTRACT SOLUTIONS

Selling to the federal government has never been more appealing, but the sophisticated proposals require experience and knowledge to successfully prepare. A proposal that misses any of the explicit or implicit requirements will likely be unsuccessful. A&C's experts stay on top of the emerging trends that affect our clients, using our unique insight and knowledge to help them comply with a variety of rules and regulations. Our industry experience and expertise is unparalleled.

SYSTEMS

With our understanding of the financial and operational needs of government contractors, we are able to assist in the installation of accounting systems to ensure compliance with government cost accounting requirements. A&C has teamed with Deltek®, the Enterprise Resource Planning (ERP) software provider of choice for project-based businesses, to offer the government contractor the best value in products and services. A&C's specialized team of consultants provides a variety of consulting services to new and current Deltek users, including installation, implementation, and ongoing support.

OUTSOURCING

A&C's Government Systems Outsourcing Group has the experience and power to help companies just like yours address both the technological challenges that today's government contractors face, as well as the personnel needs that go along with them. Whether you are a prime contractor or subcontractor, a small start-up, an established government contractor, a company experiencing the pain of downsizing, or even just temporarily short-staffed, A&C can help support your accounting group with skilled professional consultants who know their way around your business. Secure, mission critical data systems combined with the powerful expertise of our experienced accounting technology staff may be the perfect solution for your government contracting business. Our experts are classically educated accounting professionals with strong technical training and broad experience with Deltek GCS Premier and government accounting regulations.
